Analytical Proceedings

Proceedings of the Analytical Division of The Royal Society of Chemistry

Officers of the Analytical Division of The Royal Society of Chemistry

President

L. S. Bark

Hon. Secretary

P. G. W. Cobb

Hon. Treasurer

J. K. Foreman

Hon. Assistant Secretary

D. I. Coomber

Hon. Publicity and Public Relations Officer

A. Townshend

Secretary

Miss P. E. Hutchinson

THE ANALYST PUBLICATIONS COMMITTEE

Chairman

J. M. Ottaway

H. J. Cluley

*P. Gray

J. N. Miller

G. E. Penketh

T. B. Pierce

W. H. C. Shaw

D. Simpson

J. M. Skinner

A. Townshend

*P. C. Weston

J. Whitehead

**Ex Officio members*

Editor, Proceedings

P. C. Weston

Assistant Editors

Mrs. J. Brew, R. W. Hazell, R. A. Young

NAME INDEX

A

- Armour, D. G.** Low energy ion scattering as a tool for surface structure and composition analysis, 472.

B

- Baban, S.** Recent developments in flow injection analysis: determination of bismuth, thorium and copper with pyrocatechol violet by exploitation of pH, 535.
- Ballantine, J. A.** Analysis of marine sterols by gas chromatography - mass spectrometry techniques, 326.
- Barber, M.** The 1979 CS Award for Chemical Analysis and Instrumentation presented to, 443.
- Bark, L. S.** The New President, 263.
- Beadle, B. C., and Donoghue, B. R.** Some aspects of optoacoustic spectrometry in the infrared region, 276.
- Bennett, E. M., Eggins, B. R., McNeill, J., and McMullan, E. A.** Recycling carbon dioxide from fossil fuel combustion, 356.
- Bentley, A. J., See Crichton, T. J.**
- Berner, R., and Charbonnier, J. C.** Surface analysis by glow discharge, 488.
- Best, G. A.** Our results are right, give or take a little, 191.
- Betteridge, D., Lilley, T., and Cudby, M. E. A.** Acoustic emissions from polymers. Part II. Use of pattern recognition methods, 434.
- Practical considerations in the analytical use of microprocessors, 181.
- Beynon, J. H.** Applications of ion kinetic energy spectroscopy using a double-focusing instrument of reversed geometry, 329.
- Birch, B. J. See Moody, G. J.**
- British Standards Institution.** BS 5766: Analysis of animal feedstuffs. Part 1. Determination of crude ash. Part 2. Determination of ash insoluble in hydrochloric acid, 249.
- BS 2586: Glass and reference electrodes for the measurement of pH, 72.
- BS 4705: Method for the determination of acidity of petroleum products and lubricants (neutralisation index), 392.
- BS 4386: Method for the determination of mercaptan sulphur content of light hydrocarbon products (silver nitrate method), 392.
- BS 5897: Method for the determination of rolling bearing performance of lubricating greases, 392.
- BS 5849: Method of expression of performance of air quality in infrared analysers, 249.
- BS 1728: Methods for analysis of aluminium and aluminium alloys. Part 25. Titanium (spectrophotometric chromatographic acid method), 392.
- BS 5598: Methods of sampling and test for halogenated hydrocarbons. Part 8. Determination of non-volatile residue in fluorinated hydrocarbons, 151.
- BS 5659: Methods of test for acid-grade fluorspar. Part 1. Determination of flotation agents. Part 2. Determination of loss in mass at 105°C. Part 3. Determination of sulphide content. Part 4. Determination of carbonate content. Part 5. Determination of available fluorine content, 151.

British Standards Institution—continued

- BS 4401: Methods of test for meat and meat products. Part 13. Determination of L-(+)-glutamic acid content (reference method), 61.
- BS 5072: Methods of test for sodium fluoride for industrial use. Part 4. Preparation and storage of test samples. Part 5. Determination of iron content. Part 6. Determination of silica content. Part 7. Determination of soluble sulphates content. Part 8. Determination of chlorides content. Part 9. Determination of carbonate content, 447.
- BS 5705: Methods of test for sodium hexafluorosilicate for industrial use. Part 2. Determination of phosphate content. Part 3. Determination of iron content. Part 4. Determination of loss in mass at 105°C, 151.
- Bryant, F. J.** Sixth Analytical Division Distinguished Service Award conferred on, 409.
- Bugden, R. D.** Polarographic determination of nitroimidazoles used in cancer therapy, 283.
- Burguera, J. L.** Some new analytical methods based on chemiluminescence, 43.
- Burmicez, J. S., and Smyth, W. F.** Differential-pulse polarographic analysis of 4-nitroquinoline-N-oxide and its principal metabolites, 284.
- Burnill, P. J.** Obituary, 447.
- Burroughs, P.** Purity determination by differential scanning calorimetry, 231.
- Bushnell, A. C.** Oil and fat extraction. (Correspondence), 31.
- Byrne, P. G.** Monitoring of asbestos in ambient environs, 362.

C

- Calus, I. M.** Review of statistical methodology applied to the results of chemical analysis, 120.
- Campbell, W. A.** The early history of the chemical detection of poisons, 76.
- William Herapath, 1796-1868, a pioneer of toxicology. Biography, 346.
- Carpenter, P. M.** Analysis and quality control of beers and lagers during and after processing, 195.
- Caulcutt, R.** Acceptance sampling, 166.
- Chalmers, R. A.** "Hot-Blast" Clark: Thomas Clark, Professor of Chemistry, Marischal College, 1833-1860, 463.
- Chamberlain, J. D.** Cumulative sum techniques, 172.
- Chambers, R. E. See Naish, P. J.**
- Charbonnier, J. C. See Berner, R.**
- Charsley, E. L.** Calibration of differential thermal analysis equipment; the ICTA temperature standards, 223.
- Clough, W. S.** Current activities and future priorities in air and water pollution research, 365.
- Cluley, H. J.** The future of primary journals. (Editorial), 345.
- Colles, M. J.** Laser spectroscopy and environmental analysis, 271.
- Cooke, J. D.** Some aspects of water pollution control in coastal and estuarial regions of Northern Ireland, 425.
- Cooke, M. See McCalley, D. V., Naish, P. J.**
- Cooke, S., West, T. S., and Watts, P.** Use of a piezo-electric sensor as a continuous monitor of atmospheric pollutants, 2.
- Coomber, D. I.** Fifth Analytical Division Distinguished Service Award conferred on, 40, 70.

Cope, M. J. Phosphorus-sensitive molecular emission cavity analysis detector for high-performance liquid chromatography, 273.

Corfield, G. C. See **Ellis, A. T.**

Crichton, T. J., Farr, J. P. G., Russon, J., Saremi, M., Pountney, J., Bentley, A. J., and Earwaker, L. G. The analysis of annealed electrotinned steel, 479.

Crosby, N. T., and Hunt, D. C. Determination of polynuclear aromatic hydrocarbons in water, 381.

Crump, G. B. North West Region Summer Meeting, Aberystwyth, June 27-29, 1980, 461.

— Presentation to Mr. C. Whalley, 305.

Cudby, M. E. A. See **Betteridge, D.**

Cunningham, A. See **McCaig, J.**

Cuthbertson, A., and Robinson, E. Control of environmental pollution by catalytic oxidation, 423.

SUBJECT INDEX

A

- Acceptance sampling.** Caulcutt, 166.
Accuracy: Systematic approach to the control of — and precision in routine analysis. Ghersini, Ghiri and Salghetti, 197.
Acoustic emissions from polymers. Part I. Chemical and analytical aspects. Lilley, 432.
 — from polymers. Part II. Use of pattern recognition methods. Betteridge, Lilley and Cudby, 434.
Adsorption techniques: Removal of dyes from water using —. McKay and Otterburn, 406.
AFBS: Application of differential spectrophotometry to the determination of fluoride using —. Jordan, 18.
Agricultural materials: Spectrochemical analysis of environmental pollutants in —. Ure, 409.
Air pollution: Current activities and future priorities in air and water pollution research. Clough, 365.
 Enrichment factors as an indication of — source. McDonald and Duncan, 359.
Algal growths: Pollution of Lough Neagh: a multi-disciplinary approach. Wood, 369.
Analysis, chemical: Correlation and regression analysis: applications to the analysis of chemical data. Moore, 124.
 Review of statistical methodology applied to the results of chemical analysis. Calus, 120.
Analysis, regression: Correlation and regression analysis: applications to the analysis of chemical data. Moore, 124.
Analytical chemist: The —. Simpson. (Editorial), 215.
Analytical chemistry industrial travel fellowships, 550.
 — trust fund, 548.
 — trust fund accounts, 29.
 Chairs for —, 147.
 The SRC and —. Miller. (Editorial), 457.
Analytical chemists: The training of —. Stephen, 491.
 Chairs for —, 147.
Analytical Division anniversary dinner and presentation of awards, 164.
 8th A.G.M., 108.
 Atomic Spectroscopy Group. 15th A.G.M., 72.
 Automatic Methods Group. 14th A.G.M., 108.

Analytical Division—continued

- Biological Methods Group. 35th A.G.M., 39.
 Chromatography and Electrophoresis Group. 15th A.G.M., 72.
 Distinguished Service Award conferred on F. J. Bryant, 499.
 Distinguished Service Award conferred on D. I. Coomber, 40, 70.
 East Anglia Region. 12th A.G.M., 39.
 Education and Training Group. 9th A.G.M., 109.
 Electroanalytical Group. 10th A.G.M., 109.
 Elwell Award conferred on R. Gough, 303.
 Joint Pharmaceutical Analysis Group. 10th A.G.M., 109.
 Microchemical Methods Group. 36th A.G.M., 108.
 Midlands Region. 25th A.G.M., 72.
 New members of Council, 302.
 New President, Professor L. S. Bark, DSc, CChem, FRIC, MRSH, 263.
 North East Region. 14th A.G.M., 166.
 North West Region. 55th A.G.M., 165.
 North West Region summer meeting, Aberystwyth, June 27–29, 1980, 461.
 Particle Size Analysis Group. 14th A.G.M., 72.
 Radiochemical Methods Group. 13th A.G.M., 39.
 Scottish Region. 45th A.G.M., 39.
 South East Region. 5th A.G.M., 301.
 Special Techniques Group. 35th A.G.M., 72.
 Thermal Methods Group. 15th A.G.M., 39.
 Western Region. 25th A.G.M., 301.
Analytical Proceedings. Ottawa. (Editorial), 1, 107.
 Separate subscription to —. Young. (Editorial), 507.
Analytical results: Our results are right, give or take a little. Best, 191.
Asbestos: Monitoring of — in ambient environs. Byrne, 362.
Atmospheric pollutants: Use of a piezoelectric sensor as a continuous monitor of —. Cooke, West and Watts, 2.
Atomic-absorption spectrophotometry: See **Spectrophotometry, atomic-absorption.**
Automatic monitor: Design and evaluation of an — for lead emissions from stacks. Jackson, 314.
Automation: The impact of — in the pharmaceutical industry. Horsley, 177.

B

- Batches:** Acceptance sampling. Caulcutt, 166.
Beer analysis: Analysis and quality control of beers and lagers during and after processing. Carpenter, 195.
Benthic ecology: Effects of pollutants upon the — of Belfast Lough. Parker, 429.
Betteridge, Professor D: Biography, 304.
Biological surfaces: Analysis of —. Echlin, 483.
Bismuth: Recent developments in flow injection analysis: determination of —, thorium and copper with pyrocatechol violet by exploitation of pH. Baban, 535.
Boumans, P. W. J. M.: Biography, 84.
British Standards: 61, 72, 151, 249, 392, 447.

C

- Calcitonin:** Analytical and preparative high-performance liquid chromatography of polypeptide and protein hormones from normal and pathological — containing samples. Nice and O'Hare, 526.
Calcium-selective electrode: Polymeric-membrane — with covalently bound ion-exchange sites. Ellis, Corfield and Ebdon, 48.
Calibration of differential thermal analysis equipment; the ICTA temperature standards. Charsley, 223.
Cancer therapy: Applications of voltammetry in cancer chemotherapy. Smyth, 278.
Polarographic determination of nitroimidazoles used in —. Bugden, 283.
Carbon dioxide: Recycling — from fossil fuel combustion. Bennett, Eggins, McNeill and McMullan, 356.
Catalytic micro-determination of osmium at the sub-parts per billion level. Ling and Svehl, 543.
Catalytic oxidation: Control of environmental pollution by —. Cuthbertson and Robinson, 423.
Chairs for analytical chemists, 147.
Chemical data: See also **Chemical results.** Correlation and regression analysis: applications to the analysis of —. Moore, 124.
Chemical results: Review of statistical methodology applied to the results of chemical analysis. Calus, 120.
Chemical Society: The — award for chemical analysis and instrumentation. Awarded for 1979 to Dr. M. Barber, 443.
Chemiluminescence: Some new analytical methods based on —. Burguera, 43.
Chloride determination: Analysis with ion-selective electrodes near their lower limits of detection. Midgley, 306.
Chromatography, gas: Analysis of marine sterols by gas chromatography - mass spectrometry techniques. Ballantine, 326.
Micropollutant analysis by gas chromatography - mass spectrometry. Wells, 116.
Chromatography, high-performance liquid: Analytical and preparative high-performance liquid chromatography of polypeptide and protein hormones from normal and pathological calcitonin-containing samples. Nice and O'Hare, 526.
Application of high-performance liquid chromatography and enzymatic methods to food

Chromatography, high-performance liquid— continued

- analysis with special reference to the determination of sugars. Jackson, 537.
Applications of combined high-performance liquid chromatography - mass spectrometry. Games, 322.
Combined high-performance liquid chromatography - mass spectrometry. Games, 110.
Derivative and multi-channel detectors in high-performance liquid chromatography. Fell, 512.
Mechanism of ion-pair reversed-phase high-performance liquid chromatography. Hartwick and Knox, 524.
Multi-element analysis by solvent extraction and HPLC of metal-chelate complexes. Edward-Inatimi and Dalziel, 40.
Optimum conditions for high-performance liquid chromatography on the preparative scale. de Jong, Smit, Poppe and Kraak, 508.
Phosphorus-sensitive molecular emission cavity analysis detector for high-performance liquid chromatography. Cope, 273.
Pre-concentration and selective sample handling in high-performance liquid chromatography. Frei, 519.
Rapid analysis for theophylline in clinical samples by high-performance liquid chromatography. Naish, Cooke and Chambers, 44.
